

What changes happen when you heat the things below?

Before heating	After heating	Is this a chemical change? How do you know?
 <p style="writing-mode: vertical-rl; transform: rotate(180deg); font-size: small;">Photo Martin Cathrae</p>	 <p style="writing-mode: vertical-rl; transform: rotate(180deg); font-size: small;">Photo Martin Cathrae</p>	Firing a pot
		Ice
		Cake mix
		Fried eggs
		Chocolate
		Water in a pan
